Product Introduction

Use the internet to load, manage, and share your favorite photos with family, friends, and businesses, on this 7" Cloud Frame.

Features

- Build up your own cloud albums, manage slide shows remotely
- Enjoy 20GB free cloud storage space
- View photos you stored in your cloud storage
- View photos stored in your microSD cards
- Store your most precious photos in internal memory and display them
- Share photos with your family and friends via internet
- Support display multimedia
- Intuitive touch screen give all operations on your fingers
- Wireless link to internet automatically

Specifications

- Display size: 7 inch LED
- Touch Screen: Yes
- Multimedia support: Photo / Video / Audio
- Built-in Wireless: 802.11b/g/n
- Built-in Battery: Yes
- Memory Card: microSD
- USB type: 1x Micro USB OTG
- Power Adaptor Input: 110~240V; Output: 5V

Safety Precautions

Please read the following guidelines carefully to ensure user safety.

Power Precautions

- ⚠ WARNING:** indicates information that, if neglected, could result in serious injury and/or death to the user.
- ⚠ CAUTION:** indicates information that, if neglected, could result injury to the user and/or material damage.

01. Use only the authorized power supply product. Failure to do so could result in product malfunction.

02. When connecting the power source, make sure that your hands are free of moisture. Failure to do so could result in electrical shock.

03. Make sure that the power supply is firmly plugged in and not loose. Failure to do so could result in electrical shock.

04. Do not let the power cord get overly entangled and do not place any heavy objects on the cord. Failure to do so could result in electrical shock.

05. Do not connect the power supply to an electrical power strip with other various connections. Failure to do so could result in fire.

06. Disconnect the power supply during inclement weather conditions that include thunder and lightning. Failure to do so could result in fire.

Safety Precautions

Please read the following guidelines carefully to ensure user safety and avoid malfunction.

Product Related Precautions

01. Dropping the product or subjecting it to a significant impact can cause critical damage.

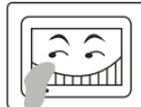

02. Spilling water or any other liquid on the product can cause critical damage.

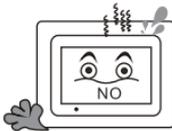

03. Striking or scratching the LCD screen may cause critical damage.

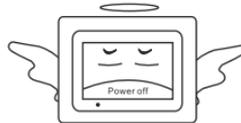

04. When cleaning the LCD screen, turn off the power and wipe it gently with a soft cloth.

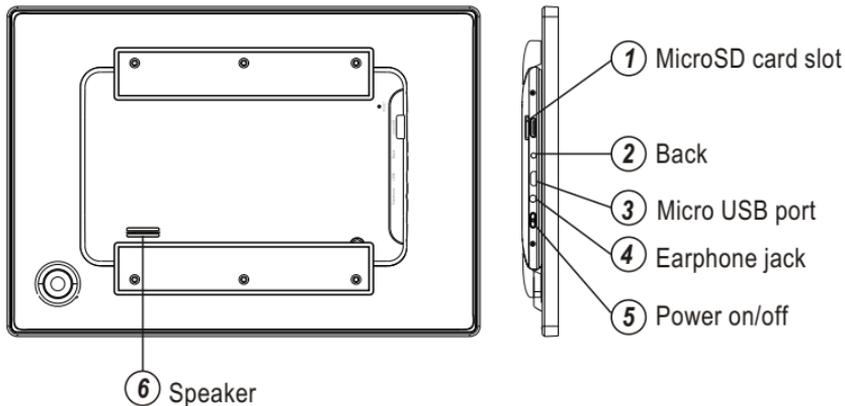

05. Do not subject the product to severe humidity and/or heat.

06. Make sure to power off the unit before disconnecting the power supply.

Instructions

- 1. MicroSD card slot:** Insert one of the microSD cards each time.
- 2. Back:** Return to the previous page.
- 3. Micro USB port:** Connect this unit to your computer by USB cable, and read U-disk by USB cable.
- 4. Earphone jack:** Insert the earphone, then can enjoy your personal time.
- 5. Power:** Press and hold on for more than 3 seconds to turn on or turn off the unit. One quick press to turn the screen on and off.
- 6. Speaker**

Connect Power

Plug the Power Adaptor into the micro USB port and also into a Power Outlet.

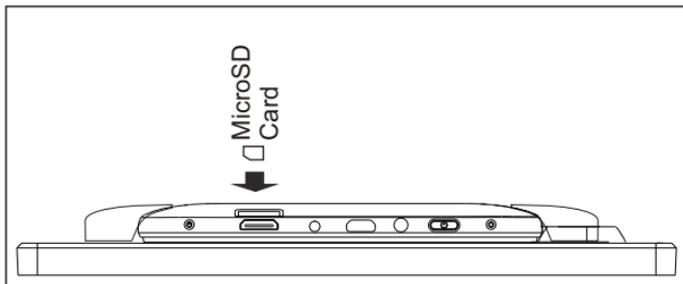

Insert a memory card

Insert card in the direction indicated by the arrow on the top of the card (the side of the memory card on which sticker is affixed face the frame).

MicroSD card is compatible with this unit.

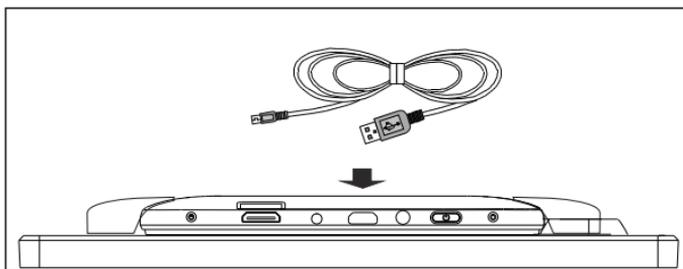

Aligning the memory card upside down may cause user-error damage.

This may nullify the warranty.

Connect the Cloud DPF to the computer

Use the USB cable to connect the Cloud Frame to a computer.

Removing the Memory Card

When removing a memory card from the frame, pull the card straight away from the unit. Avoid bending the card.

Link Wi-Fi

After power-on, the screen will appear a prompt to ask you to link to Wi-Fi, follow below instructions to link your frame to the internet.

Step 1.

Tap "Settings" button on the prompt.

Step 2.

Select the WiFi button to the "ON" position.

Step 3.

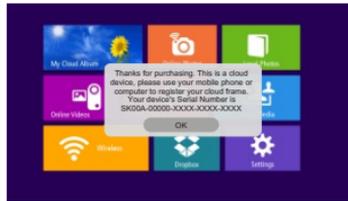

Select your network, put in your password, and then click "connect".

Note: A WiFi internet connection is required in order to register and use your frame as well as access the online features available.

Register Your Cloud Frame

After Wi-Fi is connected, tap "My Cloud Album" on home screen, below message will appear to remind you to use the Serial Number in the block to register your cloud frame.

Now you need to register your frame by going to the website "https://cloud.sungale.com" on your computer, tablet or smart phone.

From the website, Click "Sign Up", then click "Activate your Cloud Product".

You will be prompted to register the frame by providing the serial number from your frame as well as some basic personal information, then click "register" button.

A screenshot of a web browser displaying a registration form. The form title is 'Register now to activate your Sungale Cloud Account.' It contains several input fields: 'Serial Number', 'First Name', 'Last Name', 'Email Address' (with 'cloud@sungale.com' entered), 'Phone Number', and 'Password' (with a strength indicator '*****'). A 'Register' button is at the bottom right. A small note at the bottom says 'This content password does not exist.'

You need to go to the email box you used for registration to pick up your activating code and enter into on your computer, then, the screen will notify you that you have registered successfully.

Status Icon Briefing

- 1 My Cloud Album:** To load and manage photos in cloud storage space.
- 2 Online Photos:** To review or download photos from online providers.

To access these Photo Hubs select Online Photos.

Select the "+" symbol in the lower right corner to enter the online storage back list.

Select any Hub to install and download to your frame.

Select "YES" to download

Select "YES" to install

After the installation is complete, your Hub will be available on the frontscreen. You can now select and use it.

Online Features Part 4: Online Videos

The Online Videos tab gives you access to a numerous amount of online Video Hubs.

To access these Video Hubs select Online Videos.

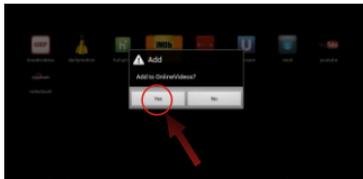

Select the "+" symbol in the lower right corner to enter the online storage back list.

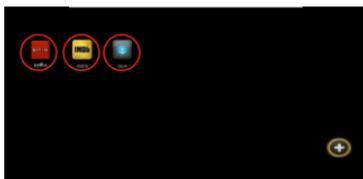

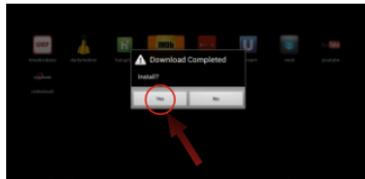

Select any Hub to install and download to your frame.

Select "YES" to download

Select "YES" to install

After the installation is complete, your Hub will be available on the front screen. You can now select and use it.

Online Features Part 5: Dropbox

Your frame has been pre-installed with Dropbox, a popular file sharing service right from the home screen.

Click "**Dropbox**" from the home screen, and log into your Dropbox account.

Now you can browse and select the photos and videos you want to download into your frame.

Note: Downloaded Pictures and Videos from Dropbox will be placed in the Local Photos or Local Videos area of Frame depending on the file. You can only view files from Dropbox and cannot run slideshows within the APP. You must first download into local memory. See "**Local Photos**" for slideshow instructions.

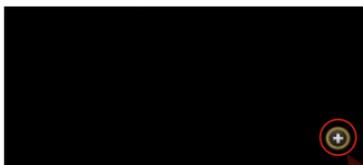

Tip: By adjusting your Dropbox settings on your smart phone, you will automatically be able to send any photo you take to your Dropbox account. This will offer an easy way of downloading photos to your frame.

Online Features Part 6: Social Media

The Social Media tab gives you access to numerous online Social MediaHubs.

To access these Social Media Hubs select Social Media.

Select the "+" symbol in the lower right corner to enter the online storage back list.

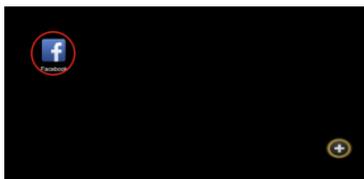

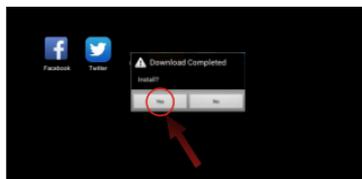

Select any Hub to install and download to your frame.

Select "YES" to download

Select "YES" to install

After the installation is complete, your Hub will be available on the frontscreen. You can now select and use it.

Online Features Part 7: Wireless

Click **"Wireless"** from the home screen, and into **"SHAREit"** APP.

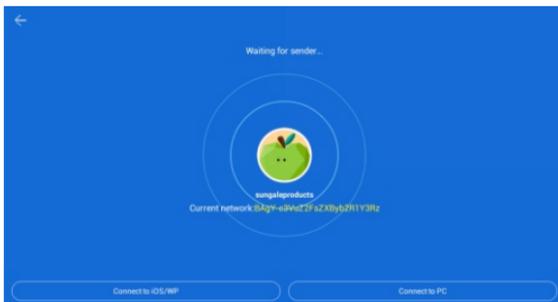

Android Device

1. The sending device and the frame need to be on the same WiFi Network.
2. Download the APP from Google Play Store on your Smart Phone or Tablet.
3. Once installed, open it and create a profile to use including a name and image. You will also need to open the APP on your Cloud Frame and create a profile too.
4. On your Phone, click **"send"** and on the frame, click **"receive"**.

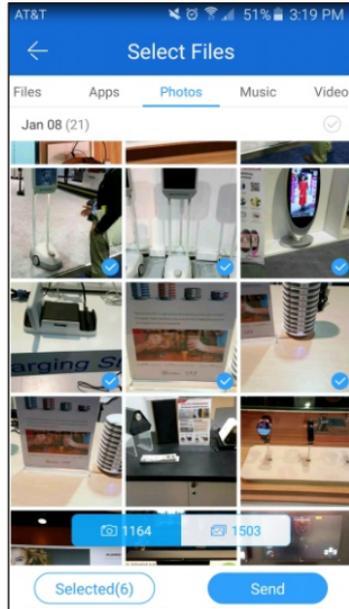

In receiving mode, your frame should look like the below.

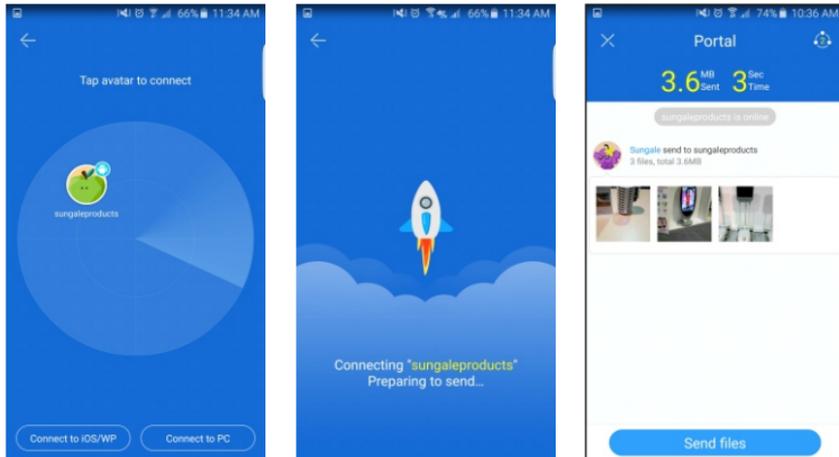

Online Features Part 6: Wireless

5. On your phone, you will need to select the file/photo you want to share - at the top, select the "**photo**" selection.
6. After selecting the files you want to send, you can click "**Send**" at the bottom.

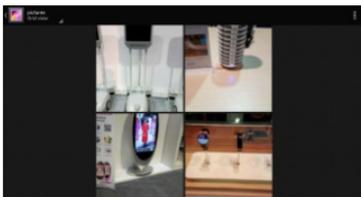

Online Features Part 6: Wireless

7. Yourframe should be in the **"receive"** mode, and you should be able to locate it.

Tap the icon shown, which should be yourframe. In the above, our frame shows in APPLE icon and has been named **"sungaleproducts"**. Your files should then be sent over the WiFi from yourphone to the Frame.

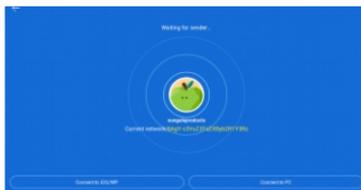

8. Youwill find the files you sent under the **"local photos"**.

Online Features Part 6: Wireless

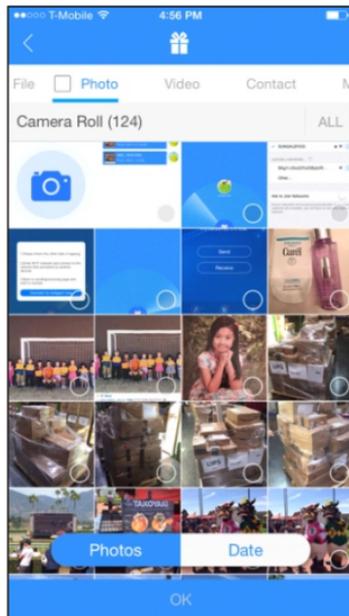

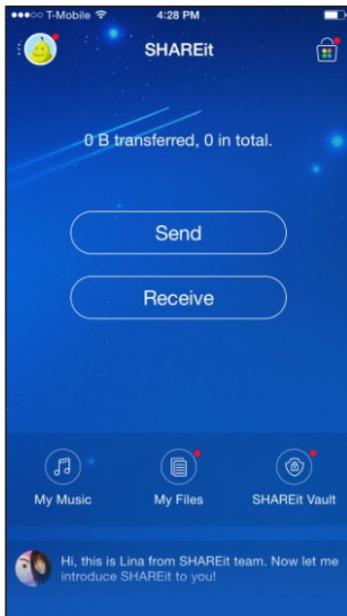

iOS Device

1. You will need to download SHAREit from the APP Store.
2. On the Frame, you will click "**receive**" and then select "**Connect to iOS/WP**" option on the bottom left and record the hotspot name associated with your frame.

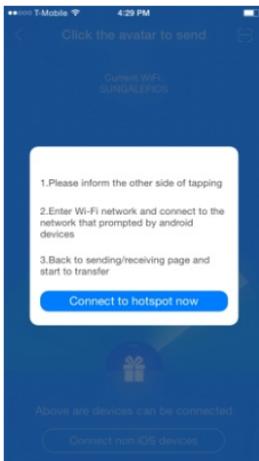

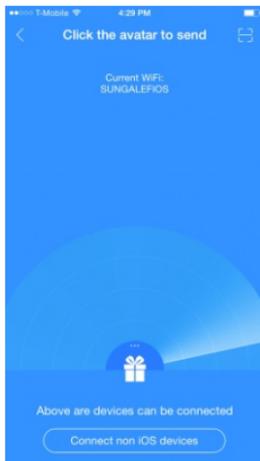

Online Features Part 6: Wireless

3. From your iPhone or iPad, you will click "**send**", select the photos or videos you want to transfer, and then press "**OK**".

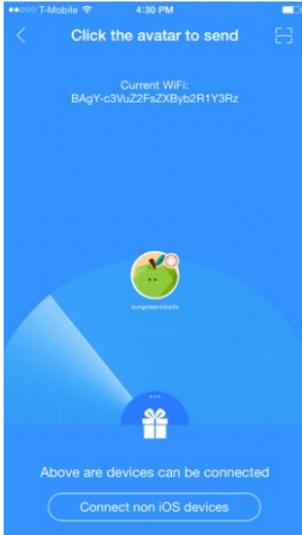

Online Features Part 6: Wireless

4. Once you have finished selecting your files, you will need to select, **"Connect non iOS devices"** at the bottom, and click **"Connect to hotspot now"**. Locate the hotspot that is associated with your frame and connect to it.

Online Features Part 6: Wireless

- Go back to the SHAREitAPP and you should see your frames icon, where you will click to select it. The files should begin to transfer from you iOS device to the frame.

Online Features Part 6: Wireless

6. From the frame, you can locate your files by selecting "**local photos**" from the main interface.

Where your downloaded & installed Apps and Google Play are located.

Web Browser

Where you can browse, surf and search the internet.

File Directory

Where you can search for locally installed apps & files.

Settings Menu

Where all your device settings are located for your frame.

1. Cannot pass the "User registration" message box on the frame

- 1) Make sure your cloud frame is a touch screen model or a remote control model. For 10" or smaller models, they are touch screen models, they do not have a RC, what you need to do is to touch on the screen to do operation. For 14" above models, they are remote control models, please make sure you have plugged in the RC receiver into the USB port.
- 2) Make sure you have setup Wi-Fi connection correctly. You can try to turn on/off the Wi-Fi switch, re-input right password. Sometimes you can try to reboot frame to get Wi-Fi connection.
- 3) If you have set Wi-Fi correctly, but still stuck at "**Authenticate Registration**" message box, it could be that you have had a serial number typo during registration, which will make the cloud server cannot find matched frame. In this situation, please take a photo of the serial number showed on the frame' screen and send it to **support@sungale.com** to ask for assistance.
- 4) In rare case, customer may set Wi-Fi connection to a hotspot Wi-Fi or a public Wi-Fi surrounding such as in bank, library, restaurant etc., where it needs to open browser to establish connection. Such Wi-Fi surrounding won't work for initial frame setup, please move the frame to a private network to finish initial frame setup.

2. Pictures are not showing on frame

- 1) This problem may result in you have not gone to the cloud frame service platform **www.cloud.sungale.com** to setup a slide show corresponding to the album and you have not push the slide show to your frame. Usually, we suggest customers firstly to go to the platform to create album, slide show, and push the slide show to the frame.
- 2) If you have created an album with using smart phone app, you still need to logon to the frame service platform **https://cloud.sungale.com** to create a slide show, and push the album you have created to a slide show, then push the slide show to the frame. Then, your cloud frame will be able to receive photos you have pushed to the album. The frame service platform setting is necessary.
- 3) Make sure the frame has good Wi-Fi connection, you can try to open browser to open a website to verify it. As long as your Wi-Fi connection is well, you should be able to receive photos you have pushed.

2. Pictures are not showing on frame

- 4) If you are sure the 1) and 2) are all confirmed with no problem, it still cannot receive photos, it is a rare case. Then, you can try to do following operation, go to Settings → Apps → All → find **"Wififrame"** app → press **"clear data"** button → reboot frame.

3. Got message "This frame is already registered by another user" when you register your Cloud frame

In this situation, it means that you have obtained an used unit no matter where they come from. In this case, you need to click or tap on Setting/Setting block/, then, scroll to bottom and click **"About devices"** and scroll to bottom, take a photo of serial number, send to **support@sungale.com**, tell some information about the frame, then, Sungale supporting team, as per its processing procedures, will verify the situation and clear the ex-user's data in the platform and cloud storage, and will help you to register the frame.

4. Got message "Please enter a valid serial number" when you registryour cloud frame

If you did input the correct serial number showing on frame, please tap or click **"I have registered"** to try to set up Wi-Fi connection firstly, then **"Serial number successfully confirmed"** will show up on the frame's screen. Turn off the frame, and go to frame service platform **<http://cloud.sungale.com>** to register again.

5. Not receiving activation code

During your registration, you should receive an activating code in the email box you have filled in the registration form. If you have waited over 10 minutes and still have not received an email with activating code, please check mail for activating code, or email **support@sungale.com** to get an assistance.

6. Had typo in email address during registration

Please email correct email address and serial number to **support@sungale.com** to ask for assistance. Then, our supporting team will correct the mistake from the back end.

7. Pictures showing sideways or upside-down on frame

Please delete the wrong photos, then, re-upload on cloud frame website or via app.

8. Frame showing "Wififrame has stopped" message frequently

It happens for too many pictures been pushed at once meanwhile the Wi-Fi connection is not good. We would like to suggest you to split the pictures into smaller slide shows, and push one by one, it is better to wait for one slideshow fully shown, then push another.

9. Remove the time/weather panel

Log on to the cloud frame service platform **http://cloud.sungale.com**, click "**Frames**" on the platform. If you find "**Weather Panel Setting**" button, you can select to turn off/on weather report. For some earlier models, you may not see the selection button, which means the frame's system needs upgrade, please contact **support@sungale.com** for system upgrade instruction, then, you can select to turn off/on weather panel.

10. The location and weather next to slideshow is not right

The time/location info is fed from the server by a third party provider. Sometimes, the time/location info is not accurate, but the wrong info will be corrected by itself after a while usually. Please do not try to adjust your frame's date/time setting, which will not change it. We are working on it, the situation will be improved soon. If an accurate time is important for you, please turn off the weather panel temporarily.

11. Frame automatically turns off after awhile

It is not turned off, it is due to the system was set to sleep after idling for certain time. For remote control models, you can press "**Power**" button on the RC to activate your frame. For touch screen models, you need to press the "**Power**" button on the back of the frame to activate your frame. Or, if you wish the frame is always keeping lighting up, please log on to the cloud frame service platform <http://cloud.sungale.com>, click "**Frames**", find "**Slide Show settings**", find "**Sleep In**" option, set it as "**Never Sleep**" or other desired value and save your setting.

12. How to add a new cloud frame into my current account?

Sungale's cloud frame does not support to add multi cloud frames into one account, each of our frames has its independent account number. We are working on Grouping Frames function, you will see the function soon.

13. What's my account number while signing in to cloud app?

It is just the email address you have used when you registered your cloud frame, and the password is just the one you are using for logged in the cloud frame's service platform <http://cloud.sungale.com>.

14. Forget password, Cannot sign in to frame service platform <http://cloud.sungale.com>

There's a "**forgot password**" link under the "**login**" screen. You can input your registered email address and "**submit**", then, you will get a new password created by the server from support@sungale.com, then, please change it to your own password.

15. How to make slideshow the photos stored in USB/SD card/On-board memory?

Go to "**Local Photos**" section, click the vertical three dots on the upper right corner, click "**start slideshow**" from the dropdown menu.

16. Can I change the local photo slide show styles/time intervals?

NO, only cloud album slide show is configurable

FAQs:

Q 1: Why can't I link to Wi-Fi?

A: Please check if you have turned on the Frame's Wi-Fi. Goto → Setting → Wireless & Networks → Slide "Off" to "On".

Please check if you have input the right password of Wi-Fi router. For more Wi-Fi related questions, please go to www.sungale.com and find Support Wi-Fi related FAQ.

Q2: Why can't I download applications from the Play Store?

A: Please check if you have registered a Google account; please check if the frame's storage has enough space. If it doesn't, you will need to insert an SD card.
